Customer Reviews

This book aims to be so broad that it is not useful. I am working on a residential care home for older adults, and so much of the information revolves around getting grants for starting various kinds of government reimbursed facilities and the process for doing so that it was of no use to me. I don't

know how updated the book is for that information. I returned it because it did not provide any value to me. If you are new to the entire field and looking for a broad overview, perhaps this is useful. Otherwise, keep looking for good information.

This book was very helpful. Very clearly written. Though I already have family who have been doing this for ten years, I found this book very helpful in starting the business. Thanks!

Many of us need to care for our elderly parents, and this book will help you think of some of the questions to discuss before making that move. Other opportunities may just drop in our laps where we might end up caring for an elderly person. It is important to keep them moving and doing for themselves, and even though it takes them longer to do it for themselves it is important to let them have that independence. Make them happy where ever they might end up. Care can be at home or in a home.

Thought this book is informative - glad I got it. Book also came in great condition and fast.

very Informative, and at a great price..I would recommend this book to anyone that is new to the start up of this particular business

It was okay but appeared to need a little more info or something that related more to my state requirements. Nina Fontaine

Too much information
