Engineering Satellite-Based Navigation And Timing: Global Navigation Satellite Systems, Signals, And Receivers

Synopsis

This book describes the design and performance analysis of satnav systems, signals, and receivers, with a general approach that applies to all satnav systems and signals in use or under development. It also provides succinct descriptions and comparisons of each satnav system. Clearly structured, and comprehensive depiction of engineering satellite-based navigation and timing systems, signals, and receivers GPS as well as all new and modernized systems (SBAS, GLONASS, Galileo, BeiDou, QZSS, IRNSS) and signals being developed and fielded Theoretical and applied review questions, which can be used for homework or to obtain deeper insights into the material Extensive equations describing techniques and their performance, illustrated by MATLAB plots New results, novel insights, and innovative descriptions for key approaches and results in systems engineering and receiver design If you are an instructor and adopted this book for your course, please email ieeeproposals@wiley.com to get access to the instructor files for this book.

Book Information

Hardcover: 672 pages

Publisher: Wiley-IEEE Press; 1 edition (December 29, 2015)

Language: English

ISBN-10: 1118615972

ISBN-13: 978-1118615973

Product Dimensions: 6.5 x 1.2 x 9.5 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)
