The Giza Power Plant : Technologies Of Ancient Egypt

Synopsis

Did a highly advanced civilization exist in prehistory? Is the Giza Pyramid a remnant of their technology? Then, what was the power source that fueled such a civilization? The technology of harmonic resonance, claims renowned master craftsman and engineer Christopher Dunn. In a brilliant piece of reverse engineering based on twenty years of research, Dunn reveals that the Great Pyramid of Giza was actually a large acoustical device! By its size and dimensions, this crystal edifice created a harmonic resonance with the Earth and converted Earth's vibrational energies to microwave radiation. The author shows how the pyramid's numerous chambers and passageways were positioned with the deliberate precision to maximize its acoustical qualities. This may be the same technology discovered by Nikola Tesla and the solution to our own clean energy needs.

Book Information

Paperback: 320 pages

Publisher: Bear & Company; 1st Edition edition (August 1, 1998)

Language: English

ISBN-10: 1879181509

ISBN-13: 978-1879181502

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 15.2 ounces (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (186 customer reviews)

Best Sellers Rank: #87,863 in Books (See Top 100 in Books) [#24 in Books > Religion & Spirituality > New Age & Spirituality > Gaia](#) [#51 in Books > History > Ancient Civilizations > Egypt](#) [#126 in Books > Religion & Spirituality > Occult & Paranormal > Ancient & Controversial Knowledge](#)

Customer Reviews

Chris Dunn has given us a powerful new vision of the Great Pyramid at Giza, by using his technical expertise to "reverse engineer" the pyramid. What he finds is a magnificent machine that produced power using the earth itself as the source and incorporating the science of vibration and sound. Dunn works backwards from the artifacts produced by the ancient Egyptians, showing that only sophisticated machine tools could have produced the hollowed out diorite bowls and other works created by this civilization. He fashions his theory on the evidence found inside the Great Pyramid, explaining the purpose of all the passages and "rooms" inside. He draws on some of the

observations of researchers who went before him, who have noted the unusual acoustic characteristics inside the pyramid. He uses the detailed notes left to us by W. Flinders Petrie more than a century ago. Petrie made extensive measurements and examinations of the pyramid long before the "tomb" theory became gospel. Dunn points out that not a single original burial has been found in any Egyptian pyramid! There is actually no credible evidence that pyramids were built to be tombs. Another compelling argument against the tomb idea is the tremendous amount of resources that went into building the Great Pyramid. Would a civilization devote such resources to something that returned nothing? Dunn argues that a power plant would provide a large return, potentially of benefit to the whole society, and with the incredible precision and durability of the pyramid, it would provide power for a long, long time. At least, until a disaster struck... Dunn sees evidence that a destructive force did strike the King's Chamber, pushing the walls back. Was it an accident inside the power plant?
